SUMMARY

Full-stack developer and data science graduate student with strong technical and Interpersonal skills. Eager to bring engineering, data analysis, and human-centered thinking to interdisciplinary team-based projects.

EDUCATION

M.S. Data Science, Analytics and Engineering **Graduating May 2027**
Arizona State University, Ira A. Fulton Schools of Engineering, Tempe, AZ

B.S. Computer Science, Magna Cum Laude — Minor: Data Science **Aug 2022 – May 2026**
Arizona State University, Tempe, AZ

WORK EXPERIENCE

Qualaces Inc., Remote: Full Stack Developer Intern **Oct 2025 – Apr 2026**

- Designed and built the core Test Suite system from scratch, including a hierarchical suite/section/test-case structure for tracking engineering quality data.
- Architected the Test Run and Milestone modules end-to-end, covering execution flow, data tracking, and milestone reporting with a UI redesign.
- Built reusable UI components and integrated RESTful APIs in an Agile workflow, collaborating with engineers through Git and code reviews.

Ira A. Fulton School of Engineering, Tempe, AZ: Residential Peer Mentor **Aug 2023 – May 2026**

- Mentored 300+ first-year engineering students over three years as the primary contact for advising and academic support.
- Planned and hosted weekly workshops on programming concepts, study strategies, and campus resources.
- Worked with faculty and advisors to identify at-risk students and connect them with support services, improving retention.
- Tracked mentee progress in Salesforce, maintaining timely documentation and follow-up.
- Managed consistent communication across mentors, advisors, and student cohorts each year.
- Facilitated one-on-one sessions helping students build academic plans, confidence, and a smooth transition to university.

Arizona State University, Tempe, AZ: ASU Sustainability Eco-Representative **Aug 2024 – May 2026**

- Led campus-wide sustainability outreach and educational programming, engaging 500+ students through events and workshops.
- Designed sustainability awareness projects on fast fashion, responsible consumption, fair trade, and environmental justice.
- Developed educational materials, presentations, and digital content to promote sustainable behaviors.
- Planned and executed original sustainability events with staff and student leaders, managing logistics and outreach.
- Supported university sustainability initiatives and community programs, strengthening campus participation.
- Cultivated leadership, public speaking, and project management skills as a residential sustainability ambassador.

PROJECTS

AI-Powered News Dashboard

- Developed a full-stack AI platform to aggregate, process, and summarize large volumes of news data using Google's Gemini API.
- Built a React/TypeScript frontend and a Python/FastAPI backend integrated with the Gemini API for automated summarization.
- Designed a MongoDB schema for efficient storage, indexing, and retrieval of articles and preferences.

Technologies: React, TypeScript, Python, FastAPI, MongoDB, Gemini API

Interactive Career Path Planner

- Built an animated, interactive career-exploration web app helping undecided first-year students discover career paths via a visual flowchart mapping interests to job outcomes.
- Designed a Neo4j graph database modeling ~100 courses and 40+ career paths across 9 fields, queried with Cypher to surface paths matching a student's interests.
- Automated semester-by-semester course planning, generating an 8-semester schedule per career path from the graph's prerequisite chains.

Technologies: React, TypeScript, Neo4j, Cypher

TECHNICAL SKILLS

Languages: Python, Java, C++, JavaScript, C, Typescript | Frameworks: React, Next.js, Node.js, FastAPI | Databases/Cloud: PostgreSQL, MongoDB, AWS, Neo4j | Tools & Technologies: Git, GitHub, Linux, Figma
